Water Board called me about this potential project. They were approached by a consultant of an operator in Edison field. They want to reinject their produced water for ASR purposes.

## Ex. 5 - Deliberative Process

John,

Attached is a brief project description in draft so you can see what we are talking about. The cross section can be blown up to any size, but can be printed in regular paper size. I am really encouraged that you see the merit in this type of project. Preservation of water is important. Please call with any comments or questions. We wait for your direction.

MJ
